PROFILE

ECE student (BTech Lateral Entry, Aditya University) with hands-on experience in embedded systems, IoT, and AI-integrated web apps. Deployed 3 full-stack Django projects, built an AI chat assistant on ESP32 with Gemini API, and completed a 6-month embedded electronics internship. Actively pursuing IBM AI/ML certifications and DSA training. Seeking roles in embedded software, full-stack development, or IoT engineering.

EDUCATION

B.Tech — ECE (Lateral Entry) | Aditya University Jul 2025 – Present **Diploma — ECE** | Aditya Engineering College Jan 2022 – Apr 2025
Coursework: DSP, Microprocessors, Control Systems, embedded system Grade: 94% · Mini project: Smart Irrigation (Arduino)

SKILLS

Languages: Python, C, Embedded C, JavaScript, HTML/CSS, SQL

Frameworks & Tools: Django, REST APIs, React, Node.js, Git/GitHub, Arduino IDE, VS Code, Cursor, Antigravity

Embedded & IoT: Arduino, ESP32, Sensors, IoT Systems, Robotics, EasyEDA, Autodesk Eagle, PCB Design, MATLAB

AI & Data: Google Gemini API, Machine Learning, Prompt Engineering, Pandas, Big Data (Hadoop/Spark), AWS

INTERNSHIP EXPERIENCE

Engineer Intern | Resolute TM – Skyquad Electronics Pvt Ltd · Hyderabad May 2024 – Nov 2024

- Designed and validated PCB schematics for embedded systems using Autodesk Eagle and EasyEDA across 2+ hardware revisions.
- Integrated sensors and microcontroller modules into IoT prototypes; conducted quality inspections and reduced rework cycles.
- Supported hardware bring-up, debug workflows, and preventive maintenance documentation for electronic assemblies.

PROJECTS

ElectroCart — E-Commerce Platform [GitHub](#) [Live](#)

- Full-stack Django app: product catalog, cart, orders, payments, auth; deployed on Render with SQLite.
- Tech: Django, Python, JS, HTML/CSS, SQLite, Render.

SkillBook — Peer Service Marketplace [GitHub](#) [Live](#)

- Platform connecting users with professionals: booking workflows, role-based access, real-time chat.
- Built scalable Django REST backend; hands-on exposure to system architecture.

AI Chat Assistant on ESP32 (Gemini API) [GitHub](#)

- Integrated Google Gemini API with ESP32 firmware for real-time AI responses via Serial Monitor.
- Managed latency, memory constraints, and API limits on resource-constrained hardware.

Smart Irrigation System [GitHub](#)

- Arduino Uno controller with soil moisture sensor and LCD; auto-adjusts watering based on real-time data.

Customised Arduino Uno PCB [GitHub](#)

- Designed full schematic and PCB layout from scratch in Autodesk Eagle.

ACHIEVEMENTS

- Best Team Award (1st / 27 teams) — IMEC Robotics Club, Aditya University
- GDG Tech Sprint Hackathon — Built [SkillSync](#) (skills-match + real-time chat) (Dec 2025 – Jan 2026)
- India AI Impact Buildathon — Participant, GUVI certified
- Smart Interviews DSA Phase 1 — Completed (recursion, complexity, bit manipulation) Mar 2026

CERTIFICATIONS (TOP 8)

[Machine Learning with Python](#) — IBM / Coursera (Dec 2025)

[Intro to Artificial Intelligence](#) — IBM / Coursera (Dec 2025)

[Generative AI: Intro & Applications](#) — IBM / Coursera (Jan 2026)

[Emerging Tech Specialisation \(IoT, Big Data, Cloud\)](#) — Yonsei / Coursera (Oct 2025)

[Pandas for Data Science](#) — Duke / Coursera (Mar 2026)

[Programming with JavaScript](#) — Meta / Coursera (Sep 2025)

[Python \(Verified Badge\)](#) — Cisco / Credly (May 2024)

[Embedded Systems + PCB Design](#) — NSDC / Internshala (Aug–Oct 2024)
